END NOTES:

1. The number of patents granted does not necessarily indicate the value of a company's technology, the effectiveness of its R&D, or whether it will be profitable. The number of patents per company varies widely from industry to industry and from company to company within an industry.

2. This report was compiled by [Harrity Analytics](#) from patent data provided by the U.S. Patent and Trademark Office. Patents reported are utility patents granted during calendar year 2025 that listed the organization or a subsidiary as the owner on the printed patent document. Using organization and subsidiary data provided to two independent third-party data providers, over 200,000 assignments were reviewed to attribute ownership to the correct organization, where applicable. Patents that were granted to two or more organizations jointly are attributed to each organization separately. Companies for which patents were granted to subsidiaries are combined with patents granted to the parent.

3. IPO has published this report annually since 1984 as a service to its members. For annual lists, go to <https://www.ipso.org/index.php/resources/>.

4. This report, published by IPO and Harrity Analytics, was prepared by Harrity Analytics using patent data provided by the U.S. Patent and Trademark Office and information contributed by IPO members. It should not be construed as representing an endorsement, warrantee, or guarantee by either IPO or Harrity Analytics of the other party's products or services.

5. The 2025 list includes the following notable corporate tree changes: (Samsung): This entity has been split into separate entities, including Samsung Electronics, Samsung Display, Samsung Electro-Mechanics, and Samsung SDI. (LG Corporation): This entity has been split into separate entities, including LG Electronics, LG Display, LG Energy Solution, LG Innotek, and LG Chem.
